

Ahmed Mohamed

Senior Frontend Developer | React | Vue | TypeScript

+201211119412 ahmad.mohamed.me@gmail.com LinkedIn Github Cairo, Egypt

SUMMARY

Senior Frontend Developer with 5+ years of experience building scalable web applications and complex SaaS product interfaces using React, Vue, Next.js, Nuxt.js, and TypeScript. Experienced in frontend architecture, reusable component systems, REST API integration, state management with TanStack Query and Zustand, performance optimization, and responsive English/Arabic RTL interfaces. Delivered production platforms across workflow automation, messaging, payments, CRM, and booking domains.

EXPERIENCE

Front-end Developer

Dreams

05/2025 – Present Saudi Arabia

Saudi SaaS company building automation, messaging, CRM, and customer-engagement platforms.

- Developed and maintained scalable web applications using React.js, Vue.js, Nuxt.js, Next.js, and TypeScript, collaborating with backend and design teams to deliver production features
- Built and standardized reusable UI components across messaging, CRM, and automation products, reducing duplicated frontend implementation and improving consistency across product modules.
- Implemented bilingual English/Arabic interfaces with RTL/LTR behavior and responsive experiences across desktop and mobile.

Key Project - Visual Workflow Automation Platform

- Built a type-safe visual workflow automation editor using React, TypeScript, React Flow, Zustand, and TanStack Query, supporting 32 node types across messaging, AI, CRM, HTTP, scheduling, branching, and data processing.
- Designed an extensible node architecture connecting typed domain models, renderers, configuration forms, defaults, validation rules, localization, and visual styling.
- Implemented graph-aware validation covering connection compatibility, branching, loops, cycle detection, trigger placement, duplicate outputs, and node-specific business rules.
- Integrated REST-backed workflows, credentials, executions, knowledge sources, WhatsApp, AI providers, templates, and multi-channel automation with caching, mutations, invalidation, dependent queries, polling, and RTL-aware interfaces.

Front-end Developer

Payiano

07/2023 – 04/2025 Cairo, Egypt

Payiano is a leading payment service provider, transforming digital payments with secure, seamless, and scalable solutions.

- Developed and maintained payment platform interfaces using Vue.js, Nuxt.js, TypeScript, and JavaScript, delivering responsive production features across the application.
- Built reusable and responsive UI components using Tailwind CSS and SCSS, ensuring consistent experiences across desktop and mobile devices.
- Integrated frontend applications with REST APIs, handling application state, asynchronous data, loading states, validation, and error handling.
- Implemented and maintained end-to-end tests with Cypress to validate critical user flows and improve application reliability.
- Collaborated with backend developers, designers, and product stakeholders to deliver and maintain production features.

Front-end Developer

Nzmly

01/2022 – 06/2023 Cairo, Egypt

Nzmly simplifies bookings and payments, enhancing productivity and boosting earnings seamlessly.

- Developed responsive web application features using React.js, Next.js, JavaScript, and Tailwind CSS.
- Integrated REST APIs for booking, payment, and application data flows, including loading, error, and asynchronous UI states.
- Built reusable, mobile-first UI components and responsive layouts supporting consistent experiences across different screen sizes.
- Improved frontend state management and component structure to reduce unnecessary updates and make application features easier to maintain.
- Collaborated with backend and design teams to implement product requirements and deliver production-ready features.

SKILLS

Front-end

Vue	React	JavaScript	Next.js	Nuxt.js	TypeScript	GraphQL	Redux	Vuex Pinia		
React Router Vue Router		HTML5	CSS CSS3 Sass Less			Jest	Tailwind CSS	Vuetify
